

ABSTRACT

[0042] Methods, systems, and apparatuses for call ticker messaging are disclosed. In various embodiments, a Call Ticker Signal may be generated by a communications device that communicates with a communications network to activate Call Ticker Services, to create and/or access a Call Ticker Profile, to create and/or access a Call Ticker Message, and/or to communicate the Call Ticker Signal to a communications address. The Call Ticker Message and Call Ticker Signal may include text, video, voice, and/or digital data.
